## PROFESSIONAL SUMMARY

**Early-career Backend Engineer** pursuing a B.S. in Data Science with hands-on experience in **Python**, **FastAPI**, and **REST APIs**. Developed a counselling platform that attracted **100+** users and built a unified SDK for AI providers, showcasing strong debugging instincts and SQL proficiency. Ready to contribute to innovative backend solutions in a dynamic team environment.

## EDUCATION

**IIT Madras** | Madras — May 2024 - May 2028
*B.S. in Data Science and application* — *CGPA : 8.59/10*
**Relevant Coursework:**
- Programming, Data Structures & Algorithms using Python
- Database Management Systems
- Modern Application Development II
- System Commands
- Modern Application Development

**G.L. SCHOOL** | Agra — 2022 - 2024
*CBSE Class XII* — *Percentage : 79.6%*

**Shiv Shakti H.S. School** | Agra — 2020 - 2022
*State Board (U.P.) Class X* — *Percentage : 83%*

## PROJECTS

**JEE/JoSAA Counselling Platform** | △ Vercel — Mar 2026 - Present
*Full-Stack Developer* | *Personal Project*
- Developed a student-focused JEE/JoSAA counselling platform to help students explore and evaluate college options during counselling.
- **Developing backend functionality** for college/counselling data processing, API endpoints, and database-backed application workflows.
- Deployed the platform and attracted **100+ users during the JoSAA & CSAB counselling period**.

***Technologies / Tools Used :*** *React, Python, Sqlalchemy, JavaScript, HTML5*

**Nopper — Unified AI Provider SDK & CLI** | Github — Jul 2026 - Aug 2026
*Python Developer* | *Personal Project*
- Built a unified Python SDK supporting **10+ AI providers**, abstracting provider-specific APIs behind a common interface.
- Implemented **synchronous and asynchronous Python execution** with streaming, retries, fallback routing, caching, and middleware.
- Added **LLM API usage tracking** for token usage, cost, latency, model, and provider metadata.
- Designed a **4-layer architecture** separating application interfaces, execution logic, provider adapters, and HTTP transport.

***Technologies / Tools Used :*** *Python, httpx, Pydantic, Typer, AsyncIO, pytest*

**Trekking Management Application** | Github — May 2026 - Jun 2026
*Full-Stack Developer* | *IIT Madras — MAD-I* | *S Grade*
- Developed a **3-role** trekking management system supporting Admin, Trek Staff, and Trekker workflows, including authentication and bookings.
- Implemented **3+ RESTful API resources** using Flask-RESTful and SQLAlchemy for managing users, treks, and bookings.
- **Debugged backend validation and business logic** to prevent overbooking, enforce role-based access, and restrict staff operations.

***Technologies / Tools Used :*** *Python, Flask, SQLite, SQLAlchemy, Flask-RESTful*

## SKILLS

| | |
|---|---|
| **Programming Languages :** | Python, C++, JavaScript, Go, C, SQL |
| **Backend & APIs :** | Flask, Flask-RESTful, REST APIs, Jinja2, LLM APIs |
| **Frontend :** | React, Vue, HTML5, Bootstrap, CSS |
| **Tools & Platforms :** | Git, GitHub, Docker, Linux, AWS, Vercel |
| **Databases :** | SQLite, PostgreSQL, MySQL, SQLAlchemy, Redis |
| **Core :** | Debugging, Problem Solving |

## CERTIFICATIONS

**AWS Academy Cloud Foundations** | Credential — Aug 2026
*Amazon Web Services*
**Covered:** AWS Architecture, AWS Cloud & Core Services, Amazon S3, AWS Pricing & Support *Training and Certification*
